## ABOUT MINNIEKE

---

Minnieke is an Occupational Therapist and has a clinical background in neurological rehabilitation. She has been working as a case manager since 2016.

Minnieke is an experienced and highly regarded case manager, working with clinically and socially complex caseloads including traumatic brain injury, spinal cord injury, cerebral palsy and amputations. She is confident in working on cases involving compromised mental capacity and with challenging behaviours.

Minnieke takes a holistic approach to case management to enable her to devise and implement bespoke rehabilitation and support for clients. Her clinical experience allows her to appraise and review client progress to ensure optimum outcomes.

Minnieke works alongside multidisciplinary teams to ensure a cohesive and effective rehabilitation and collaborates to devise meaningful and realistic goals for individuals. She case manages both litigated and post settlement cases and has developed excellent knowledge of the claims process and the role of litigators and the court of protection.

Minnieke is an exceptionally motivated and diligent case manager which allows her to be responsive and receptive to client's needs to ensure they feel heard and supported.

Prior to her case management role, Minnieke worked for four years as an advanced occupational therapist in the field of neurorehabilitation at Harrogate District Hospital and prior to this she worked for six years a community specialist occupational therapist for Mid Yorkshire NHS and treated clients with a range of presentations including neurological conditions, dementia, orthopaedic injuries and individuals with mental health conditions.

Minnieke has also worked as a locum occupational therapist in community, hospital and clinic settings. Minnieke continues to develop her clinical knowledge and competencies by attending conferences, training and specialist events to support lifelong learning in brain injury and case management. Minnieke is a member of the BABICM council and is part of their training and education group and is passionate about raising the profile of case management and supporting competency within the profession.
